Green Your Network And Get More Value.

3585 Monroe St.
Santa Clara, CA 95051 USA

Your campus network can go green without breaking your capital and operating budgets.

Extreme Networks® carrier-grade switches are among the most energy-efficient on the planet. And with Extreme Networks, you get more by paying less, both up front and over the longer term.

Our products feature intelligent capabilities like automated provisioning, flexible architectural options, advanced QoS and sophisticated failover features to keep your network running and students, faculty and staff smiling.

With Extreme Networks you can green your network without spending a lot of green.

networks™

True Stacking Capability. Seamless Management.

3585 Monroe St.
Santa Clara, CA 95051 USA

Fixed-configuration switches don't have to be a management headache. With SummitStack™ from Extreme Networks® you get a flexible way to increase switch density and capacity, and a range of port configuration choices to help you keep control of your upfront capital requirements.

Manage up to 8 Summit® X650, X480, X450 and/or X250 switches as a single unit. Select from Fast Ethernet, Gigabit Ethernet, or 10 GbE over copper, fiber or Power-over-Ethernet interfaces. All with a single IP address, a single point of authentication and a single management interface.

Get true stacking capability and seamless management with Extreme Networks.

Get An Earth-friendly Network.

3585 Monroe St.
Santa Clara, CA 95051 USA

Green initiatives make a lot of sense, not just for the planet, but for your bottom line as well. Luckily, Extreme Networks® carrier-grade switches are among the most energy-efficient in the industry. And our products give you much more bang for far fewer bucks.

Higher education institutions across the globe rely on Extreme Networks products for sophisticated capabilities like automated provisioning, sub-50ms failover and advanced QoS, in addition to energy thriftiness. All this adds up to a long-lasting network infrastructure foundation—built for growth and change—that maximizes the use of your IT resources.

Graduate your network to green with Extreme Networks.
